Theophilus C. Onyejiaku

Technical Content Writer | AI · Machine Learning · Software Testing · Data

Lagos, Nigeria | onyejiakut@gmail.com | +234 907 375 1704 | LinkedIn | GitHub

Technical Content Writer with 5 years of experience and 660+ published articles for developer-focused brands including Educative, Comet, Tricentis, InfluxData, Stackify and Autify. A working engineer who builds and runs the code behind every tutorial, so explanations are accurate, practical and easy to follow. Published work consistently reaches Google's first page for target keywords.

CORE SKILLS

Writing	Technical Articles, Tutorials & How-to Guides, SEO Content, Developer Education, Research & Fact-Checking, Editorial Collaboration
Topics	AI & Machine Learning, Agentic AI, Software Testing, SQL & Databases, Logging, Tracing & APM, Computer Vision, Data Analytics
Technical	Python, SQL, TensorFlow, Keras, Scikit-Learn, OpenAI API, Streamlit, Pandas, Flask
Tools	WordPress, VS Code, Jupyter Notebook, Google Colab, GitHub

TECHNICAL WRITING EXPERIENCE

Technical Content Writer (Part-time) Autify — Aug 2025 – Aug 2026

- Wrote in-depth articles on software testing, artificial intelligence and machine learning.
- Worked with content managers to ensure clarity, factual accuracy and editorial quality; all posts reached Google's first page for target keywords.

Technical Content Writer (Part-time) InfluxData — Sep 2023 – Jun 2026

- Produced articles on developer tools, machine learning and AI for a global engineering audience.
- Met strict technical and brand standards with project managers and editors; consistently achieved first-page rankings.

Technical Content Writer (Part-time) Hitsubscribe — Aug 2023 – Apr 2026

- Wrote technical blog posts on developer tools and machine learning, researched in depth and delivered to precise specifications.

Technical Content Writer (Part-time) Tricentis — May 2023 – Feb 2026

- Wrote technical blog posts on SQL and Agentic AI, working to detailed briefs from project managers.
- All published posts ranked on Google's first page.

Technical Content Writer (Contract) Stackify — May 2024 – Dec 2024

- Authored articles on programming languages, logging, tracing and application performance monitoring.
- Met strict editorial guidelines and delivery timelines; every published article reached first-page Google rankings.

Machine Learning Technical Writer (Part-time) Comet — Jul 2022 – Dec 2024

- Wrote tutorials on machine learning and AI solutions, including computer vision, object detection and Streamlit apps.

Technical Content Writer Educative.io — Oct 2021 – May 2023

- Wrote 660+ technical articles covering programming languages, frameworks, modules and libraries for developer learning.
- Recognised as Top Contributor and Technical Writer of the Month.

SELECTED PUBLISHED WORK

- 10 Benefits of AI in Software Testing You Should Know About – **Autify**
- What Is Python Logging? A Complete Introduction – **Stackify**
- A Guide to Installing Node-RED – **InfluxData**
- A Guide to Understanding the Pivot Function in Oracle SQL – **Tricentis**
- Create a Computer Vision App in 10 Steps Using Comet and Streamlit – **Comet**
- Build and Monitor an Object Detection Model in 5 Steps Using Comet – **Comet**
- A Dual-Purpose App: Text-to-Image and Custom Chatbot Using Comet, GPT-3.5, DALL-E 2, and Streamlit – **Hitsubscribe**
- Implementing Logistic Regression Model for Binary Classification – **Educative**
- What Is XGBoost? – **Educative**

TECHNICAL BACKGROUND

Data Analyst (Part-time) RKY Consulting Services — **Jan 2024 – Present**

- Train cohorts in SQL, Python, Excel, Power BI and Tableau; 400+ learners taught across several countries.

Data Analyst Medbury Medical Services — **Apr 2022 – Sep 2024**

- Analysed multi-sector sales data and automated revenue dashboards for 3 cross-functional teams.

Artificial Intelligence Instructor (Part-time) Franklin Comprehensive — **Sep 2024 – Jul 2025**

- Taught data preparation, machine learning fundamentals and computer vision apps with Python, Streamlit, TensorFlow and OpenCV.
- **Enterprise AI content series (Medium):** articles for enterprise AI buyers, each anchored by a runnable demo project such as a governed MCP layer.
- **Peer-reviewed researcher:** IEEE conference paper on deep-learning flower recognition; second manuscript on YOLOv11n tomato detection under review.

EDUCATION

B.Eng. Agricultural & Bioresources Engineering — **2015 – 2022**

Federal University of Technology Owerri, Nigeria | CGPA 4.20 / 5.0 | Best Graduating Student
